

Business Integration Manager

Galetech Group is a sustainable energy company, which is involved in project development, construction, operations and management in the renewable electricity and building sectors.

The business has a long history in the Irish wind energy industry and has grown to employ over 100 staff across various business areas.

The successful candidate will be joining Galetech at a time where senior personnel have the opportunity to become instrumental to the future development of the company and team.

At the heart of our success lies a young and vibrant team with an entrepreneurial people focussed approach to help play our part in the sustainable energy transition. We would welcome someone to join our team at a senior level who share these values.

About the Candidate

The successful candidate will have a minimum degree level in business related subject.

In excess of three years experience working in industry and supporting senior management in strategic or operational role.

About the Role

- To be highly visible within the business, understanding priorities and solving issues within the business units with the key stakeholders
- Support the day-to-day operations and work closely with the management team to ensure smooth and efficient business operation
- Working with our management team in understanding our strategic group growth plan and developing on going strategy
- Promote adherence to company policies & Good Corporate Governance
- To manage the need to both support and drive organisational change in accordance with agreed business plans, achieving standardisation and scalability in processes whilst lifting efficiencies and enhancing the effectiveness of these processes wherever possible, using technology driven solutions where suited.
- Manage central business functions including Public Relations, Human Relations, Finance, IT
- Drive continuous management process engaging with relevant managers to ensure goal setting and review process completion
- Drive all initiatives within the business
- Implement and monitor our continuous development strategy
- Support projects and other tasks/projects as deemed appropriate by the Board of the company

Skills required:

- Able to track high level as well as understanding detail
- Track record in business operations
- Good at planning and organising
- Strong at communicating
- A good leader
- The courage to make difficult decisions when required
- Technical/engineering knowledge a distinct advantage

Employment Basis
