

## Structural Engineer

Galetech Sustainable Living, a part of the Galetech Group ([www.galetechgroup.com](http://www.galetechgroup.com)), is a modular building solutions business involved in the design, construction and supply of off site modular buildings to the commercial and residential sectors.

The successful candidate will be joining GSL at a time of growth within the business and will have the opportunity to have a hands on role in the development journey of the business.

The role would suit a motivated, practical and adaptable individual who has the ambition to work as part of a progressive and innovative team. The role will support the delivery of a range of projects across Ireland.

### About the Candidate

- The successful candidate will have demonstrable buildings - structural engineering design experience in the Irish/UK construction market
- Strong analytical knowledge and understanding of engineering principles.
- A civil engineering degree, QQI level 8 with a minimum of 5 years experience.
- IT skills with some structural engineering design software such as AutoCAD, BIM, Revit and Robot
- A 'can do' attitude with commitment to excellent customer service.
- Must be resourceful and take initiative even when given minimal direction

### About the Role

- Prepare designs of modular 3D building systems
- BCAR design and assigned certification for MMC/off site construction projects
- Assist with project costing and project delivery management
- Support engineering activities in other parts of the group

### Employment Basis

Salary commensurate with experience, expenses, defined contribution company pension, permanent with 6 month probationary period.
